19:00 – 20:00 Party – welcome drink and buffet

20:00 – 20:30 Announcement of winners

20.30 – ... Party continues

# Conference speakers

**Marika Kukkasniemi,**  
Kokoa Agency

**How to design a top-notch digital learning product? Explaining which factors will ensure the educational quality and learning engagement**

I'm an ex-teacher and I have experienced how hard it is to find educational application with great pedagogical design. Our company Kokoa has developed own method to evaluate and validate digital learning products. We can help developers to build better educational products and teachers to find them more easily.

Prof. **Gunnar Liestøl,**  
University of Oslo

**Beyond 'Pokémon Go'. Historical events in mobile augmented reality**

'Pokémon Go' is the popular break through for mobile augmented reality on a global scale. The presentation, however, will discuss and demo how it is possible to employ the same technology to reconstruct specific historical events on location and at the same time provide access to background information in online archives and databases.

**Maria Alejandra Lujan Escalante,**  
Lancaster University

**Transformed by code: from quantifying self to qualifying together**

I propose to imagine together designs that go beyond, and open broadly, from "user-led" or "user-centered" approaches to ones that care about differences and that bridge gaps with others - humans and nonhumans. I propose to challenge the big capital 'I' that has monopolized digital markets, public and preprogramed interactions to propose a creative exploration of possibilities of 'togetherness'.

**Jan Detlefsen,**  
KIGOP

**You Will Never Leave Home Again**

Virtual reality is set to play a huge role in both education and tourism as the technology becomes cheaper and more accessible. In this talk Jan Detlefsen explores the current state of VR in both areas and how we might visit different cultures or go to school in the not-so-distant future. Do we even need to leave home?

**Andres Mellik,**  
Cognuse

**Comprehensive digital health solution for early rehabilitation**

The presentation will cover how different media formats are effectively used for screening of clinical complications in the earliest care settings and how various user groups are engaged and driven to mitigate the effects of those complications.

**Uldis Zarins,**  
Anatomy next Ltd

**Is anatomy only for doctors?**

I will tell the story of how we moved from art to anatomy for artists to artistic anatomy then to medical anatomy and will talk about problems and solutions we had.

The hackathon will run in three tracks:  
Health  
Education  
Tourism

**Mentors:**  
Anders Jepsen  
Uldis Zarins  
Sara Ponnert  
Olli Vallo

Hendrik Väli  
Antti Rammo  
Ave Pill

**Jury:**  
Uldis Zarins  
Marika Kukkasniemi  
Jan Detlefsen

Sara Ponnert  
Rene Toompuu
